

Gary R. Boodhoo — Senior UI Designer

Portfolio: garyb.design | San Francisco, CA | gboodhoo@gmail.com | 415-802-4076

Information is never neutral. I am a designer of controlled contamination. I build interfaces for game worlds where the signal is dirty, the city has an agenda, and the player still needs a way through. I turn volatile systems into readable machinery through story, prototypes, specifications, and playtests. My work runs between interaction design, art direction, engineering, and QA from concept through delivery.

CORE COMPETENCIES

Game UI systems | Player experience | Visual language | Interaction design | Prototyping | Interface specifications | Cross-functional review

TOOLS

Figma | Photoshop | Illustrator | After Effects | Unreal Engine | Framer | Lua | Python | React | HTML/CSS

EXPERIENCE

Skinjester Studio — User Experience Director | 2016–2025 | San Francisco, CA

Built an independent UX studio helping creative partners explore, plan, and deliver design work across games, live services, and emerging technology.

- **Project Kestrel, ZeniMax Online Studios:** Established early UX and interaction direction for an unreleased online co-op action RPG through Unreal Engine prototypes, spatial UI concepts, and weekly design reviews with studio creative leadership.
- **Platform Services, ZeniMax Online Studios:** Owned cross-platform UX for The Elder Scrolls Online across web, PC, PlayStation, Xbox, and Steam, improving player account management and purchase flows through analytics and support feedback.
- **Loss Prevention, Iveda Systems:** Designed spatial UX for a real-time equipment tracking platform, using indoor mapping, mobile workflows, and operational alerts to make complex location data actionable.
- **Exhibitions, Workshops & Talks:** Facilitated public programs and delivered presentations at GDC, Stanford University, and art and technology festivals, helping mixed audiences find a personal voice in computational art.

ZeniMax Online Studios — User Experience Lead | 2013–2016 | Cockeysville, MD

Directed cross-functional interface work across art, design, engineering, QA, and external partners as The Elder Scrolls Online expanded from PC to PlayStation 4 and Xbox One.

- Reinvented ESO's dense PC interface as a couch-first console experience for TV and controller play.
- Audited hundreds of interface features and mapped them into a system matrix so the team could scope and plan the console redesign.
- Established interface guidelines for lists, panels, screens, and dense item data, keeping layout and interaction rules consistent across the game.
- Owned the in-game store UI, defining item browsing, detail views, purchase flows, and seasonal offer placement.

RealU — User Experience Consultant | 2012–2013 | Singapore

Helped *Otherland*, an Unreal Engine-based free-to-play MMORPG, regain momentum by establishing interface direction and a production framework for HUD, front-end screens, panels, and dialogs.

- Audited existing work to identify inconsistent layouts, interaction patterns, and production blockers.
- Created feature designs for item management, storage, and customization systems tied to player ownership and the game economy.

Osterhout Design Group — Product Designer | 2010–2011 | San Francisco, CA

Designed interface concepts and field-use scenarios for an integrated wearable AR system presented to commercial and military stakeholders.

- Explored speculative interface concepts ranging from situational awareness to system settings.
- Developed touchpad gestures for navigation and selection on a 9-DOF wearable controller.

Nihilistic Software — Senior User Interface Designer | 2008–2009 | Novato, CA

Designed and scripted UI for *Zombie Apocalypse*, keeping arcade-style four-player co-op easy to follow on a shared screen.

Electronic Arts, Maxis — User Experience Consultant | 2008 | Redwood Shores, CA

Designed Game Entry and neighborhood editing flows for *The Sims 3*, helping new players start smoothly and returning players stage elaborate scenarios in their towns.

- Built HTML/JavaScript prototypes to evaluate and share onboarding, setup, customization, and re-entry flows with the team.
- Mapped dynamic game data and UI states across tooltips, panels, and dialogs, working with QA and design to turn fragmented player-facing information into reusable interface patterns.

LucasArts — Senior UX/UI Designer | 2006–2008 | San Francisco, CA

Led UI design for *Star Wars: The Force Unleashed*, taking the interface from concept through console launch.

- Owned UI design for menus, HUD, and player information screens, keeping the game interface consistent with the Star Wars visual language.
- Authored UI behaviors in Lua and worked with engineering, QA, and production to tune interactions, fix issues, and support first-party certification.

Electronic Arts, Tiburon — Senior User Interface Designer | 2001–2005 | Maitland, FL

Grew from contributor to interface lead across multiple *Madden NFL* releases.

- Designed front-end flows and broadcast-style presentation systems for annual *Madden NFL* console releases.
- Scripted and validated hundreds of screens under tight production and certification timelines.
- Co-developed the EA Sports UI design system used by four studios to ship seven annual titles, including *FIFA* and *Madden NFL*.

ADDITIONAL EXPERIENCE

Rumble Games — User Experience Designer | 2011–2012 | Redwood City, CA

Serious Business — User Experience Designer | 2009–2010 | San Francisco, CA

Rainbow Studios — Senior User Interface Designer | 2005–2006 | Phoenix, AZ

EDUCATION

Full Sail University (A.S., Video Production) | Massachusetts College of Art and Design (Studio for Interrelated Media)

PUBLIC SPEAKING

Game Developers Conference | Stanford University | San Francisco State University
